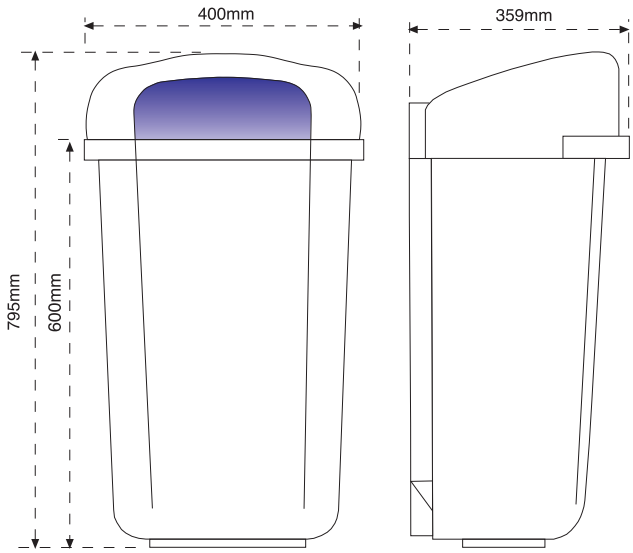
The DIVA LITTERBIN- Street Furnishing Systems

The DIVA Street Litter Bin is manufactured by high molecular plolyethylene, compact injection moulding process, guarantees a long service life, is stabilized against UV rays and due to its characteristic material properties is extremely robust, frost and chemical resistant.

The rear side of the body is reinforced for strength.



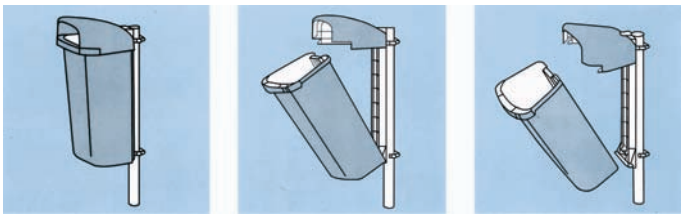
SPECIFICATIONS
Container material: High Density Polyethylene
Weight: 4 kg
Capacity: 50 Litres
Can be mounted on lamp posts, mast or on walls
Cigarette plate as option
Self - adjusts when inserting the bin
Option: Litter man logo

Cigarettes can be extinguished on the optional metal plate without damaging the bin.

Mix & Match colours to optimise aesthetic value and compliment surrounding.

Emptying – also by interchanging method – is carried out by simply unlocking with a universal key.

The stability of the DIVA container was increased by optimising the shape and the thickness of the bin walls.



Locking mechanism

Key lock
